

PRODUCT STEWARDSHIP SUMMARY

Ferric nitrate solutions

1. Chemical identity

- Ferric nitrate, C.A.S. No. 10421-48-4, Chemical formula $\text{Fe}(\text{NO}_3)_3$
- Water, C.A.S. No. 7732-18-5, Chemical formula H_2O
- Nitric Acid, C.A.S. No. 7697-37-2, Chemical formula HNO_3

2. Uses and Applications

Ferric nitrate solutions are used in the manufacture of catalysts. They also have applications in electronics, and the dyeing and tanning industries.

3. Physical / Chemical Properties

Ferric nitrate solutions are reddish-brown transparent liquids with a slight odor of nitric acid. They are normally stable. Ferric nitrate solutions are corrosive and may produce oxides of nitrogen upon thermal decomposition.

4. Globally Harmonized System (GHS) Classifications

Danger. Causes severe skin burns and eye damage. Causes serious eye damage. May cause damage to organs through prolonged or repeated exposure.

5. Exposure

Exposure to ferric nitrate solutions may occur in industrial applications where engineering controls have failed or are not in place. Exposure can also result when safe work procedures are not followed, or workers do not use personal protective equipment. Exposure to ferric nitrate solutions may occur during environmental releases if response operations are not conducted properly or in a timely manner.

6. Risk Management

Engineering controls such as exhaust ventilation, dedicated closed systems, leak detection, welded joints, and properly designed storage equipment are recommended to minimize the risk of exposure to ferric nitrate solutions. Safe work practices and worker training on the handling of corrosive liquids is also recommended. Personal protective equipment such as safety glasses, impervious gloves, respirators, and work uniforms are necessary to prevent worker exposure. In the event of an environmental release of ferric nitrate solutions, emergency personnel should follow appropriate emergency response guidelines for corrosive liquids and wear adequate protective equipment to minimize exposure during response operations.

7. Additional Information
