Bismuth Hydroxide

Technical Specifications

Bismuth	79.5% min.
Sulfate	0.01% max.
Chloride	0.01% max.
Iron	0.01% max.

Product Number

1466

Description:

White-yellow amorphous powder, soluble in acids and insoluble in water.

Application:

Packaging:

50 kgdrum - 26 gallon fiber drum

Chemical Formula:

$\text{Bi}(\text{OH})_3$

Manufactured under ISO 9001 registered quality management systems.

Description

Bismuth Hydroxide is used in applications involving pigments, glass, and ceramics. It is an inorganic intermediate. Utilized across a diverse range of industries, the chemical morphology of Bismuth Hydroxide can be altered as per the specifications provided by each unique business need. The physical properties of these products are critical in determining the color performance of the pigments and catalyst performance of intermediates.
