Shepherd

CREATING VALUE THAT BRIGHTENS LIVES

Beauty & Personal Care Mineral-Based Ingredients

- High Quality Manufacturing
- Tight process control & consistency
- Robust quality systems & traceability
- Responsible product stewardship aligned with global safety expectations

Shepherd Chemical supplies specialty materials that support performance, stability, and sensory enhancement across a wide range of personal care formulations. Our mineral based ingredients integrate cleanly into diverse product formats while aligning with global quality and safety expectations.

Performance Highlights

Oil Absorbtion	Anti-odor	Anti-dandruff	Custom Additive Development

Key Metal Chemistries

Zinc Neodecanoate
Zinc Octoate
Zinc Carbonate

Eco-Friendly & Safe Innovations

Shepherd Chemical develops sustainable personal care solutions, replacing microplastics with silica-based alternatives and creating anti-odor ingredients free from phthalates and parabens. We also offer safer anti-dandruff options that avoid amines and selenium while maintaining effectiveness.

50%

Custom Co Development & Tailored Innovation

A defining strength of Shepherd Chemical is our ability to co develop materials directly with customers.

Customize the molecule to make it yours:

- Chelating agent
- Carrier oil
- Metal Concentration
- Metal Constituent
  - Aluminum
  - Bismuth
  - Boron
  - Copper
  - Manganese
  - Silica
  - Titanium
  - Zinc

Partnerships that Drive Impact

- Companies seeking differentiation via custom chemistry
- Brands moving toward sustainability-focused additives
- Technical teams open to co-development

Your next breakthrough formulation starts here!
